**Principal's Report**

- Where did first term go? The end of term is here and it only feels like last week that the term began. Highlights have been: the swimming program, athletics and swimming sports, P-2 sports day, dress up days, the announcement of $5.2 million in re-build funding and students working hard to improve their literacy and numeracy skills.
- To add to the excitement we have had better than state NAPLAN relative gains data and we have been notified that, once again, we have been short-listed as finalists in the Education Excellence Awards.
- All members of the community are warmly invited to our ANZAC Day Ceremony which will take place on the 24th April at 10:30 am at the P-6 Assembly area. The ceremony has become a real community event and all interested parties are warmly invited to attend. The ceremony is expected to take about 30 minutes with light refreshments offered after the service.
- Enjoy the term break, travel safely if you are getting away and prepare your children for a very busy Term 2 and some more exciting news on the re-building of our school and continuing development of our teaching and learning programs.

If you have any concerns or issues that you wish to discuss with me please feel free to give me a call at school (55983381) or on (0407345324)

Rosalie Moorfield
Principal

Congratulations to:
Our Inter-school athletics team and to our Year 5 Campers who have had a very successful final week of Term 1

---

**Assistant Principal Reports**

Congratulations:
- To all students on a successful term. Make sure you enjoy your holidays and come back enthusiastic and prepared for Term 2.

Year 7-12 parent teacher Interviews (5-8 Building):
- Thursday 3rd April 5:30pm-8:30pm
- Friday 4th April 10:00am-1:00pm

All student interim reports have been mailed home. Parents are not required to book an official time with classroom teachers. Strong parental attendance is always encouraged. Parent teacher interviews enable all three parties (student, parent, teacher) to provide valuable feedback to each other and strengthen their working relationship.

Year 7 2015 (Taste of Secondary Education Day): Last Friday Timboon P12 Year 6 students together with Simpson P.S Year 6 students participated in the taste of secondary education experience (see below). This was the first phase of our Year 6-7 transition program. The next phase will be our 'Timboon on Display' evening to be held on Wednesday 21st May.

24th

ANZAC Day Service 10:30

25th

ANZAC Day public holiday
We have had a busy few weeks in the TAP into Dairy Year 7/8 science elective with a guest speaker and excursion. We were lucky to have Phil Keegan from the Warrnambool Vet Clinic visit to discuss whole farm planning. He showed us maps of what his farm originally looked like and what he changed it to, and explained why he made the changes. From this students gained a better understanding of the importance of a good farm layout and how this can benefit production and make life easier. Following on from Phil’s visit we visited two local farms this week. We stopped at Cossack’s Dairy to look at their calf shed and calves. We discussed the structure and positioning of the shed as well as calf bedding etc. Students had the opportunity to get their hands dirty and assist with feeding the calves. From here we travelled to Bruce Cashmore’s farm and drove the length of the farm while discussing the process he went through to change the site from a sheep farm to a dairy farm. Students discussed the importance of tree lines and quality tracks and observed the herringbone dairy. This trip consolidated what Phil had discussed the week prior.

In term two Year 8 students will start their TAP project where they will use their measurement skills to answer questions about the design and operational efficiency of a large dairy property.

They were provided with the opportunity to listen to guest speaker, Phil Keagan from the Warrnambool Veterinary Group who gave an excellent talk about aspects of whole farm planning such as soil types, shed location, tracks, waterways, calf sheds, prevailing winds and a number of other important considerations that combine to make an efficient and viable dairy farm. Phil spoke of his own personal journey and accomplishments relating to the purchase of their own dairy farm and the challenges and rewards that he and his wife experienced over the years. Students were able to ask Phil questions to improve their own knowledge of whole farm planning and many were able draw on their own experience of living on a farm during discussion time.

SEAN FITZPATRICK
ASSISTANT PRINCIPAL

Student ID cards are available for students in years 7 to 12 from the office. $5 each.

A Taste of Secondary
On Friday the 28th, all the year sixes spent a day at the high school pretending to be high schoolers. We did heaps of fun activities like cooking, science, animation and performing arts! We are all really excited to go to high school. By Rose.

Wow! What a day we had at secondary school. I enjoyed home economics. The chocolate truffles were delicious. I can’t wait for high school. By Liana

On Friday the 28th of March the grade six went to the Secondary campus for a day to see what it was like. It was really fun because we met new teachers and got free lunch. My favourite thing was the cooking because we made rum balls and got to take them home to eat. By Michael

Last Friday all the year sixes went to the secondary school to see what it was like. We got to go to the secondary assembly which was different to ours. Then we went to our classes. My favourite was definitely cooking but the most interesting was history. By Taya

Last Friday the grade 6’s went to the secondary part of the school. 6A started with home economics. My favourite part of the day was animation because it was really fun to make the video. We also did science, history and preforming arts. I enjoyed the day a lot. By Stephanie.

Taste of secondary was amazing. History, home economics, performing arts, science and home group. Learning new things was so fun. My favourite subject was home eco because I love cooking. I will miss primary school. By Kasey

Last Friday 6A and 6B went on a day to the high school. We had cooking, drama, science and animation. The best part was cooking. We made chocolate truffles. Yum! Rochelle

Wow! What a day it was last Friday. Purple Day and A Taste of Secondary in the one day. At first we had to go to the 5-8 Building and everyone got a name tag. For 6A the day started off with home economics and we made chocolate truffles. They were good! For the rest of the day we had a pretty full day. We had performing arts, animation, science, history, free lunch and home group. Overall I think it was a magnificent day. By Lily

I think secondary is going to be awesome! I really like history and home economics. In history we talked about a guy called Forrest Fenn who hid heaps of treasure somewhere, but no one knows where. The only clue is the riddle he made in his book which is called “The Trill of the Chase”. In home economics, we made these really cool rum balls and they tasted delicious! We did heaps of other things as well, like drama, science, home group and animation. History and home economics were my favourites.
Year 7 Students get a taste of the Pacific
Year Seven Geography students celebrated the end of a successful term this week with a taste of the tropics—enjoying several foods grown and used across many of the Pacific Islands. Students have been “Getting Specific About the Pacific”, learning about the people, places and wildlife of our region through a variety of investigations and the viewing of some amazing documentary footage. We look forward to moving our focus to Asia and Antarctica during Term 2.

TERRY’S TECH TALK

Today’s topic is Backup
Terry, my computer/iPad needed to be re set and I can’t find my data – can you get it back?
I hear these words too often at school, usually with tears of “all my hard work is gone” – and that’s just the teachers! I can feel the pain and totally understand losing hours of work put into an assignment or report writing, but then I have to ask “the question” – “do you have a backup?”.
When I get a yes answer, we all rejoice and I help restore the backup for them, but a no answer ends in more tears as I explain the work is gone forever.
But how do you backup important work?
Back up is different for each device, operating system and your location.
1. Computer at school: All students and staff have a “U drive” to store files on. This can be accessed anytime you are connected to the school network and is backed up regularly (your backup is backed up) but this cannot be accessed from home. This could be used to copy files to whilst at school but also keep a copy on the computer for home use. Just remember which file is the newer file.
2. Computer at home: best to get yourself an external hard drive. These are reasonably priced and as a general rule bigger the better but 500 Gig will be enough for most people. You can now just copy and paste files to the drive, or Windows has backup programs built in. If you are using Windows 8.1, go to the start menu and type “file history”. This will allow you to set up an automatic backup which will back up regularly to the drive.
3. iPad users: you can use one of two methods on iPads, computer or iCloud. I like the iCloud as it backs up without the user needing to do a thing. You can connect to a computer, but the problem here is remembering to connect it on a regular basis. Just today I had a student who forgot her passcode which required the iPad to be reset (three students in two days forgot their passcodes and needed iPads reset). Once an iPad is reset ALL data is wiped for security reasons and only backed up data is restored. The above student’s iPad was connected to her parents’ home computer and had not been connected since its original connection. As you can imagine, once connected to the computer to be connected again the computer restored the iPad to how it was last time it was connected where as if they had used iCloud backups would happen regularly.

Just remember backups are just that, a copy of your work. It is no use just saving your work to an external drive or USB key and thinking it is safe. The external device can fail just as much as the computer. Important files should have at least two separate locations (not C and D drive) and a business or high level backup should be stored at a different location – consider fire or break-in. I am currently working with a business whose premises got broken into and the computer was destroyed, the data on the computer is estimated at thousands of dollars – they did not have a backup, but will from now on.
Everyone’s backup needs are different and as always I am happy to answer questions or suggest ideas for your backup.

Thanks for taking the time to read this article.

The next second-hand uniform sale will be held on Friday 2nd May (1:00- 1:50pm in the SEU building.) For enquiries please call Katrina, 5598 3443.
Interschool Equestrian News
Tomorrow Timboon P-12 will be represented at the Emu Creek Pony Club Interschool Dressage Championships at Terang. Approximately 100 students and their horses from 30 schools will be competing this year. Our team is:
Louis Janseen and Comanche
Rory Coverdale and Chardonnay Park Puff N Stuff
Abbey Gass and Ellenray Barwidgee
Goodluck to our riders.
CHERYL MILLER

Primary Science

Preps explore Magic Magnets
This Monday the Preps finally had their Science Launch. Lots of exploration occurred in the 5-8 room as the Preps firstly made predictions about what materials would be attracted to magnets—there were some surprises! Then after watching a demonstration of floating magnets they challenged each other to pick up a string of paper clips and raced cars around race tracks using magnetic force through the tables.
At the end of the session students reflected on their learning. They said: “magnets can push and pull each other”, “magnets pick up metal (but not all)” and “magnets can work through tables”. Lots of fantastic learning Preps!
Website of the week

WANTED
This year’s VCAL students are looking for an old caravan as a project to support school community events once modified and refurbished. If anyone may have or know of an available caravan please contact the school.

Port Campbell Auskick
Commences on Thursday, 1st May at 4:40pm
Phone Ash Tregae for more info
0419 359 768

ANZ NetSetgo! in Port Campbell
Is your 5-10 year old interested in learning how to play netball?
Netball Australia's Junior Netball Program has been developed to provide children with the best possible learning and playing experience that enables them to develop a positive introduction to netball. The program incorporates skill activities, minor games and modified matches. Most of all, it's fun!
When: Every Thursday during Term 2, 4.30pm (10 week program starting Thursday 24 April)
Where: Port Campbell Rec Reserve Hall
We need a minimum of 10 participants to start a centre in Port Campbell.
The program will coincide with Auskick each Thursday at the Rec Reserve.
Please SMS or phone Brooke Barnewall on 0438 580 419 ASAP to register your interest.

Victorian College of the Arts (VCA) and Southbank Precinct
– There is to be a major redevelopment project at Southbank, jointly supported by the University of Melbourne, the Victorian Government, the Myer Foundation and the Ian Potter Foundation. This is good news for the University of Melbourne (VCA is part of the University), and for the cultural vitality of the city of Melbourne. This is the largest redevelopment project in the history of the VCA, extending the campus space with a new visual arts wing. It will also create a new entry point to the university, opening the campus more fully to students, business and residents. The plan involves using the historic Victoria Mounted Police Branch stables in Dodds St as a dedicated space for arts education, exhibition and public access.

Explore Deakin University
– Parent and student tertiary information nights:
  - Warrnambool campus – 6-7.30pm, Wed 2 April
  - Melbourne Burwood – 6-8pm, Wed 21 May

Qs World University Rankings
– University of Melbourne – Melbourne has 11 subjects ranked in the top 20, and 27 subjects in the top 50. Education at the University has been ranked second in the world in the rankings. It has also ranked well across social sciences, engineering and technology, life sciences and medicine and arts and humanities. The education ranking is a strong endorsement of the university’s commitment to ensuring that future teachers receive the highest standards if training, said the Dean of the Melbourne Graduate School of Education, Prof. Field Rickards.

La Trobe University
– La Trobe has announced that it ranks among the best in the world for a number of subject areas, according to the latest QS World University Rankings by subject. Over 3,000 universities worldwide and 10,639 programs of study were evaluated to produce the rankings. La Trobe’s history discipline, which in the QS rankings system includes archaeology, ancient history and classics, was ranked 38 in the world and third in Australia. It was ranked in the top 100 in the world for communication and media studies, linguistics and sociology, while agriculture and forestry, psychology and education were ranked in the top 200. For more information about the QS rankings see: http://www.topuniversities.com/university-rankings

EXPLORATION DEAKIN UNIVERSITY
– Parent and student tertiary information nights:
  - Warrnambool campus – 6-7.30pm, Wed 2 April

– ‘A Day at Melbourne’ - explore Parkville campus, check study options, hear current students, find out about entry requirements, course structures and other opportunities. 10am-3.30pm, Fri 11 April; Register: www.futurestudents.unimelb.edu.au/events, or call 13 MELB for information.
• Geelong Waterfront – 6–8pm, Wed 28 May

CLINICAL EXERCISE PHYSIOLOGY – Enjoy studying sport? Then Clinical Exercise Physiology might be the career for you. Where physiotherapists assist people with movement disorders using techniques to assist muscles and joints to move to their full potential, clinical exercise physiologists use exercise to prevent and rehabilitate disease and injury in the community. Accredited Exercise Physiologists are formally recognised by the Dept. of Health and Aging as allied health professionals, which means that they are able to deliver Medicare-compensable services. Deakin’s Master of Clinical Exercise Physiology aims to produce quality exercise physiologists. This is the first and only accredited exercise physiologist course in Victoria to be accredited by Exercise and Sports Science Australia (ESSA). To be eligible for this program, students must be able to demonstrate eligibility for exercise scientist accreditation from ESSA, and provide evidence of 140 hours of exercise service delivery for apparently healthy clientele. This can be achieved by completing Deakin’s Bachelor of Exercise and Sport Science, including the accredited exercise science – ESSA sequence.

INDIGENOUS STUDENT EXPERIENCE MONASH DAY – Do you want to get a taste of university life? The Indigenous Student Experience day is an opportunity for Year 9 - 12 students to get a hands-on experience of what Monash University has to offer. There will be interactive sessions where participants can choose areas of study they are interested in. Meet staff and current indigenous students, gain information on how to apply, and what support is available for indigenous students. When: 10am-1.30pm, Fri 2 May; Where: Robert Blackwood Hall, Monash University Clayton Campus; RSVP by 25 April: kristel.keleher@monash.edu. Ph 9905 8699; See: www.monash.edu.au/study/life/indigenous

RMIT NEWS – RMIT is a ‘dual-sector’ institution, offering degrees, diplomas, certificates, pre-apprenticeships and short courses. The main campus is in Swanston Street, Melbourne, with other campuses located at Brunswick and Bundoora. What are a few of the courses available?

• Bachelor of Arts (International Studies) – This career-oriented degree prepares students to work in international development, security, diplomacy, political economy, law and global governance. An international internship and language study is compulsory (Chinese, Japanese, Spanish, French, German, Greek or Italian). Some graduate destinations: Department of PM and Cabinet, Dept. of Premier and Cabinet, AusAID, Dept. of Defence, Dept. of Immigration and Citizenship.

• Bachelor of Applied Science (Property and Valuation) – covers property law, planning, valuation, development, investment funds management, asset/commercial property management, law, construction techniques and project management related to commercial property, not real estate. It involves infrastructure like ports and schools. Why study it? It is financially rewarding, you’re not in an office all day, has a mixture of management and hands-on work.

• Bachelor of App. Sci. (Project Management) – A project is an event with a start and a finish time. The course offers students the opportunity to gain structured employment experiences within the industry to enhance academic learning. Graduate destinations: Construction – building and infrastructure projects and property development; Non-construction – client-side project management, event project management, business project management, IT, health.

NOTE: The first year of the above two degrees is the same, along with the B. App. Sci. (Construction Management). This allows for collaborative projects to be undertaken.

• Associate Degree in Aviation (Professional Pilots) – Boeing estimates that 192,000 new pilots will be required by 2032! On graduating, students may find employment in charter/regional airlines, outback station flying, sightseeing, fire spotting and beach patrols and flight instructing (with Instructor Rating). With enough hours, they may go on to chief pilot, fleet, or flight operations manager. Pilots are trained for the general flying progress test, private pilot licence, commercial pilot licence and air transport licence. The current annual fee is about $60,000 (NOTE: a total of up to $96,000 can be borrowed through FEE-HELP).

• What makes RMIT Science programs special? RMIT has entry pathways from Diploma and Associate degrees run in VET. You have a choice of specialisation, with a major/minor combination, double degree or integrated honours. RMIT courses have a strong hands-on component with plenty of practical experience, labs, pilot plant and field trips. All students complete an independent project in their final year and they all complete a work placement or a project-based team working component. There are overseas experiences, semester exchanges and International Student volunteer opportunities.

NOTE: RMIT is holding ‘Big Picture Experience’ information sessions about many of their courses in the Term 2 holiday break. See later editions for details, or www.rmit.edu.au/experiencedays now.

TRADES PRE-APPRENTICESHIPS – These can be an option for early school leavers. Swinburne, for example, has a range of pre-apprenticeships providing Certificate II level courses of up to six months full-time. They provide skills and experience of an industry before any commitment to a full apprenticeship. Options include bricklaying, carpentry, electro-technology, engineering, horticulture and plumbing (additional options available at other institutions). The next commencement opportunity (part-time) for pre-apprenticeships at Swinburne is from Mon 7 April, with the next major intake commencing from Mon 7 July. Info: 9214 5395.

Spare time during winter school holidays? Why not volunteer at this year’s Fun4Kids Festival – Sunday 29 June to Sunday 6 July 2014?
Sign up now for one or more days (two 4 hour shifts each day of the Festival) and be part of the wonderful Fun4Kids Festival volunteer crew. Secondary School Students who wish to volunteer must be 14 years of age or over at the start of this year’s Festival.
There is a variety of workshop areas in which to volunteer – lots of Art and Craft areas; Computers/Robotics; Cooking; Lego; Painting; Science/Electronics; Scrapbooking; Volunteer Staff Cafeteria; Ten Pin Bowling; Woodwork ........
Secondary School Students with internet access are able to complete and return a SECONDARY SCHOOL STUDENT VOLUNTEER REGISTRATION WEBFORM – see website www.fun4kids.com.au Click on ‘GET INVOLVED’.
OR contact the Fun4Kids Volunteer Manager, Sharon Wohlers on 5559 4834 or swohlers@warrnambool.vic.gov.au for more information or to request a hard copy of the Secondary School Student Volunteer Registration Forms to be posted out.
Thursday, 3 April 2014

Dear Parents,

If your child has been identified as having a medical condition that requires careful monitoring by staff the school requires the information listed below.

To ensure that all staff are aware of your child’s condition the details listed below are displayed in the sick bay and in the Administration building. This information is also forwarded to your child’s teacher, coordinators and the first aid coordinator.

If you believe the school does not have this information and you are agreeable to the publication of such information, please complete the form below and return to me by 2nd May.

If your child has asthma a School Asthma Action Plan must be completed and signed by your child’s Doctor.

If your child has an allergy that requires an Epipen an Anaphylaxis plan must be completed and signed by your child’s Doctor.

These forms are available from the school or by downloading from:

If your child’s medical condition has been registered with the school you will receive an individual details form this week.
Rosalie Moorfield – Principal Timboon P-12 School

Daisy offers parents a convenient and powerful way to keep in touch with their child’s school environment and ongoing progress. It provides them with constant access to the most current information about your school, including important dates, upcoming events and key messages.

Daisy incorporates intuitive systems designed to save time for teachers, parents and administrators alike, by allowing parents to access both general and specific information whenever and wherever they need it; receive automatic notifications on important matters; or communicate directly with teachers about issues concerning their child.

FEATURES OF DAISY DESIGNED FOR PARENTS INCLUDE:

- The ability to view and monitor their children’s schedule or progress at any time. Parents have convenient access to their child’s personalised diary from a web browser, iPad or smart phone application.
- A secure, private messaging system allowing parents to communicate directly and instantly with their child’s teachers in a dedicated, controlled environment.
- A fast, effective group-messaging system which allows parents to receive universal or targeted updates on school events. Notifications can be sent to parents in real-time, across a number of communication platforms, to ensure they are always informed of anything which impacts their child.
- The option to receive automatic homework reports on their child, delivered periodically by email, helping them to keep track of their child’s performance and how well they are coping with their workload.

If you would like to have access to the Daisy e-planner Diary please provide your email details in the section below and return it to the School General Office:
