Congratulations to our school and wider community for making last Friday a huge success. The Coast FM Breakfast Team (Monkey, Loggy and The Big Fella) enjoyed the opportunity to host live from our school. This event was well supported by local businesses. A big thank you Bedggy (Timboon Takeaway), Timboon Moo Juice, Timboon Butchers, Timboon IGA, The Fat Cow, Schulz Organic and the Timboon Provedore for dedicating their time and resources. A big thank you to former student Nathan Hunt (Coast FM) for making the show possible. We have a wonderful community!
- Mid-year holidays are now here. Hopefully the holidays will provide families with an opportunity to rest, recover and prepare for a busy Term 3. Thank-you to all those families who have supported our various extra-curricula activities this semester. The contribution of families and community members in value-adding to our school can never be underestimated.

- The cold, wet windy weather has highlighted the conditions that our bus drivers face daily. A special thank-you to the bus companies for the great job they do in getting our students to school safely.

- There are some staffing changes for the second semester: Lisa Kensit will be on leave for Terms 3 & 4. Anne Fraser will be returning to fill in Lisa’s role. As mentioned in last week’s newsletter, Mr Daniel Walker will be our new Acting Assistant Principal for Terms 3 & 4. Again, I would like to thank Gabby Theologous for assistance in this role over the last three terms.

- Our eight Year 9 students have returned from the Alpine School for Student Leadership (China experience). The students will be presenting to the school next term. Our Vietnam trip is currently underway and students, staff and parents have arrived safely.

- Have a safe and enjoyable break!

**CYBERSAFETY PARENT WORKSHOP TONIGHT!**
(Hosted by Police Community Liaison officers)
23\(^{rd}\) JUNE, 6.30pm, 5-8 Building
Light supper provided

**Buildings update:** In preparation for the new secondary building we have been advised to remove the trees between the old hockey oval and the footy oval in the upcoming holidays. These trees have been assessed by a qualified arborist. The trees are over 60 years old and have significant decay and potentially pose a health and safety threat. It is hoped that this area will be used to replant a new garden area that will complement our new building and beautiful school grounds.

**Timboon Agriculture Project**

Students have been busy with lots of TAP inclusive studies over the last few weeks. The organisers of Fun4Kids contacted the school to purchase lavender to be used for activities at the Fun4Kids festival in Warrnambool over the school holidays. Our Year 4/5 students have started corresponding with Year 4 students from their sister school, Lysterfield Primary School, as part of the Discover Dairy Student Pen Pal Program. The Pen Pal Program is aimed at connecting classrooms from different parts of the country and encouraging students to think and talk about their learnings. The Year 2 science students hosted some really big machines to help reinforce their learning about ‘Push and Pull’. Last week, the Cows Create Careers students hosted panelists who outlined their various career paths. CCC students conclude their studies this week by visiting the farms of Peter Fulton and Bruce Cashmore to visit their calves and learn about whole farm layout. Further details are outlined below. Remember to visit our TAP blog on the Timboon P-12 School website for regular updates and more details and photos.

**Year 4/5 Discover Dairy Student Pen Pal Program**

**Cows Create Careers panel**
As part of their investigation into various careers in the Dairy industry, the Year 7/8 CCC students hosted industry personnel who outlined their career paths. Tristan Reid, (The Vet Group), Will Verco, (Agribusiness banker, CBA), Christopher Vogels, (dairyfarmer ex Timboon P-12 student), Dale Haywood (Territory Sales Manager, Coprice), Madeleine Francis, (Extension Coordinator, WestVic Dairy) and Stephanie Maloney, (Account Manager - Industry, WCB), described their backgrounds, education, why they chose agriculture and the favourite and least favourite aspects of their various jobs. The panelists gave sound advice including the importance of demonstrating a willingness to work hard and learn and that it was alright if students didn’t know what they wanted to do as experience and talking to people often lead to opportunities. Once again, we are very fortunate to have people of this calibre offering our students advice.
To conclude their science studies of ‘Push and Pull’, the Year 2 students were able to observe some big machines in action! Once again, Lachie McNeil provided a McHale HS2000 Twin Satellite wrapper which his driver, Clint, demonstrated using a Massey Ferguson 7475 tractor. Students could see the push/pull forces exerted when Clint wrapped a silage bale he provided and a bale generously loaned by John Renyard. Tim and Beth Roberts demonstrated how their ‘very new’ New Holland C232 Bobcat used force to move and Tim described the hydraulics and rams that were used to move the bucket. The students were then asked to describe the push/pull components of Tim Robert’s Kobelco 13.5t excavator which had a log grab on front that Tim was able to manipulate to move sleepers in an enthralling demo. Thanks again Clint, Beth, Tim and John

If you wish to contact your child at school, please do so through the general office, not via mobile phone.

June:
23rd  Parent/student Cybersafety workshop
+ light supper, 6.30pm 5-8 Building
23rd  School reports distributed
24th  Final school day for Term 2; 2:30pm finish

The B. Design in Performance Design will be taught at the VCA. It will be different from the B. Fine Arts (Production) in that students will be chosen on ATAR only, it will not involve acting, students will be exposed to a range of areas, not just one specialisation as with the B. Fine Arts and there will also be more conceptual thinking in the B. Design.

The B. Design provides pathways to more than 20 different Masters degrees in areas including: Engineering, Design, Computer Science, Agricultural Science and the Faculty of the Victorian College of the Arts and Melbourne Conservatorium of Music.

NEW DEGREES AT AUSTRALIAN CATHOLIC UNIVERSITY (ACU) – ACU has campuses in several Australian states. The Melbourne campus (located in Fitzroy) has 10,000 students, and is growing. As a publicly funded university, ACU is open to students of any or no religion, and has a commitment to empower its graduates with the knowledge, skills and professional experience needed to make a difference in the world.

Interestingly, the QILT 2015 University student experience survey shows that ACU graduates earn $600pa more in starting salary than Melbourne and Monash graduates.

New courses at the Melbourne campus in 2017 are:

- Bachelor of Science – will prepare graduates with the skills needed to apply a sophisticated understanding of a broad and coherent body of scientific knowledge to professional work in a range of science contexts. Majors offered: Chemistry, Biology and Environment. Prerequisites are: Units 3/4 with at least 30 in EAL or 25 in any other English, and a minimum of 25 in Maths (any) and 25 in science (any)
- Bachelor of Teaching/Bachelor of Science – prepares graduates with skills to apply a sophisticated understanding and coherent body of scientific knowledge to professional work in a range of science contexts within an education setting
- Bachelor of Physiotherapy – Commencing at the Ballarat campus

VICTORIA UNIVERSITY (VU) IS INDUSTRY CONNECTED – VU is both a provider of higher education and VET courses, with campuses in Footscray, St Albans, the City, Melbourne and Werribee. One of VU’s strengths as a university is its links with Industry. The Industry Faculty alone VU has over 900 partnerships with a broad range of organisations across Victoria and beyond. Many professional experiences are offered such as:
- Teaching in rural/remote areas
- Overseas study tours to countries like Malaysia, China and Timor Leste
- Sporting, literacy and leadership programs with sporting organisations including Western Bulldogs
- Mentoring school students in university-ready skills
- Creative art projects.

Graduates find employment in youth work, early childhood education, kindergarten, primary and secondary school, adult and vocational education and in special needs education.

Find out more at www.vu.edu.au/education-placements.

TURN YOUR HOBBY INTO A CAREER AT RMIT – Melbourne plays an integral part in Australia’s vibrant and growing animation, games and interactive media industries. It is home to independent start-ups and small gaming and app development studios, and is a hub for award-winning animation and VFX companies – like Iloura, whose team has worked on Hollywood blockbusters like Mad Max. You will be immersed in a culture of animation and design, where staff are practicing artists and designers. You will collaborate on projects across year levels and in real world studios.

Through studying games and animation at RMIT you will become skilled in producing interactive experiences by developing your conceptual design, storytelling and specialist art skills – perhaps turning your hobby into a career.

Check out the courses and studios at RMIT Open Day, 10am-4pm, Sunday 14 August.
